1. What you can do with Sricam CMS

The Sricam CMS is the free software used on Microsoft Windows XP/7/ 8/ 10 PC. Via Sricam CMS, you can:

- Access the cameras via admin login (LAN) or mail/user login (WAN).
- Watch live video streams from more than one camera in the same time.
- Record and save live videos on your PC.
- Watch or transfer video files from Sricam's built-in micro SD card to your PC
- Convert files to MP4 format.

Note: Enter Sricam App on your smartphone to update camera's configuration.

This article includes the following sections.

2. Requirements for using Sricam CMS

Make sure of the following requirements are met:

- Windows XP/7/8/10 is running on this PC.
- Your camera has successfully set up and is connecting to the Internet.
- The PC has the Internet access.

Note: When the PC and cameras are in the same LAN, Internet access is not mandatory.

- You have your camera ID and camera password.

Note: There are two ways to access your camera from a laptop or desktop PC: admin login (LAN) or mail/user login (WAN).

Admin login (LAN): When your camera and computer or laptop device is connected to the same network, login with default UserName "admin" and none password . If Sricam CMS doesn't detect camera, you can access camera via mail/user login (WAN).

Mail/user login (WAN): When the network outside of your home or business network (e.g., coffee shop, work computer, etc.) a free account is required to watch live video.

3. Download and Install the Sricam CMS

Download Sricam CMS from: www.sricam.com/download

Once installed, the following icon will be displayed on the PC's desktop:

Note: For Windows 10 systems, you need to install and run "Sricam CMS" as an administrator.

4. Admin login (LAN)

Note: For Mail/user login (WAN), Please go to Section 8

Running Sricam CMS, click "admin login " to the window shown in Figure 1 with default UserName "admin" and none password bring ups the Sricam CMS main control window shown in Figure 3.

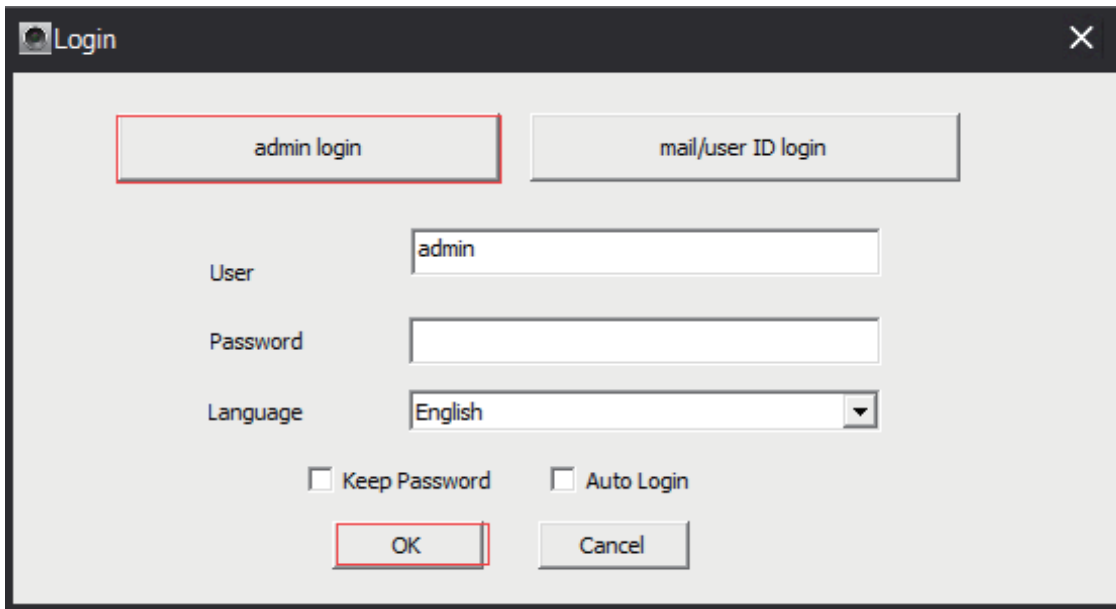

Figure 1 Login Window

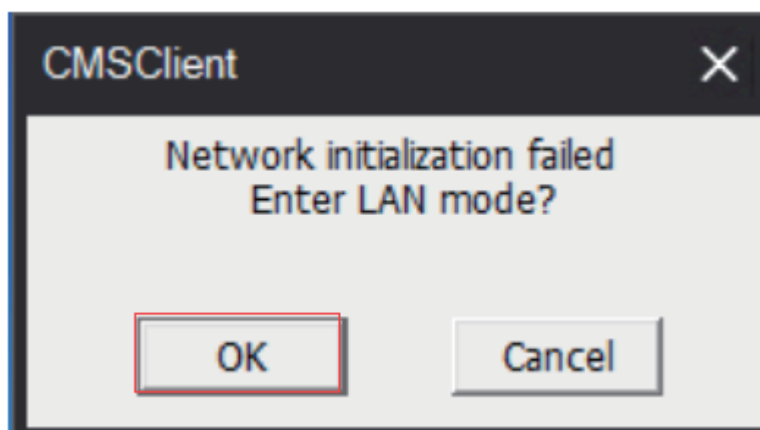

Figure 2

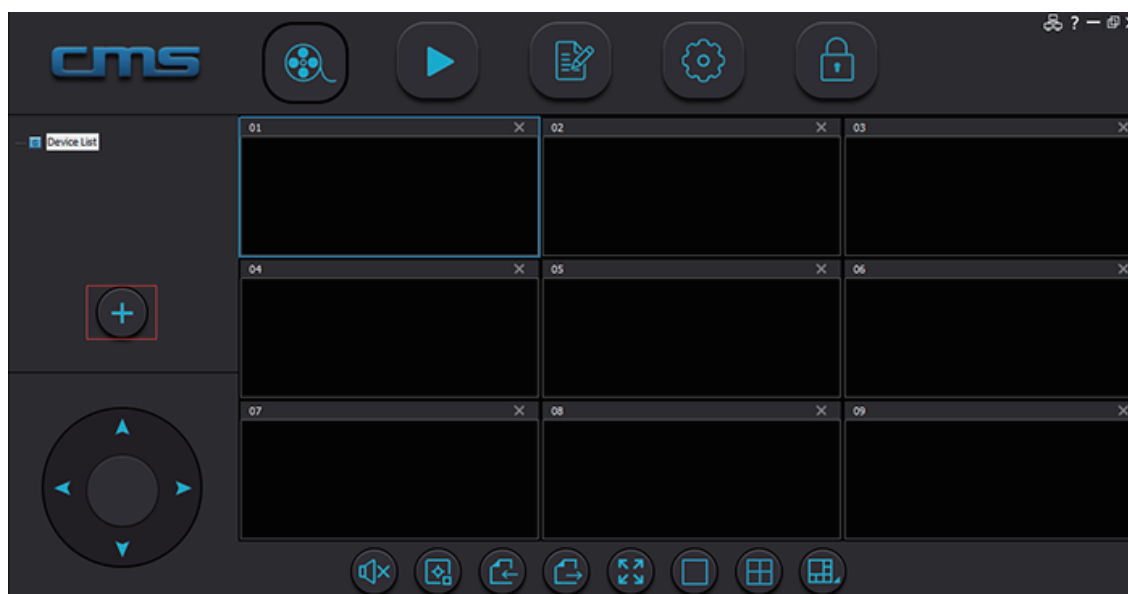

Figure 3 Sricam CMS Operation and Interface

Click the “add device” button. The window shown in Figure 4 will pop up. Follow the belowing steps to add devices: Note: If the devices can’t be detected you can try to disable your PC’s firewall.

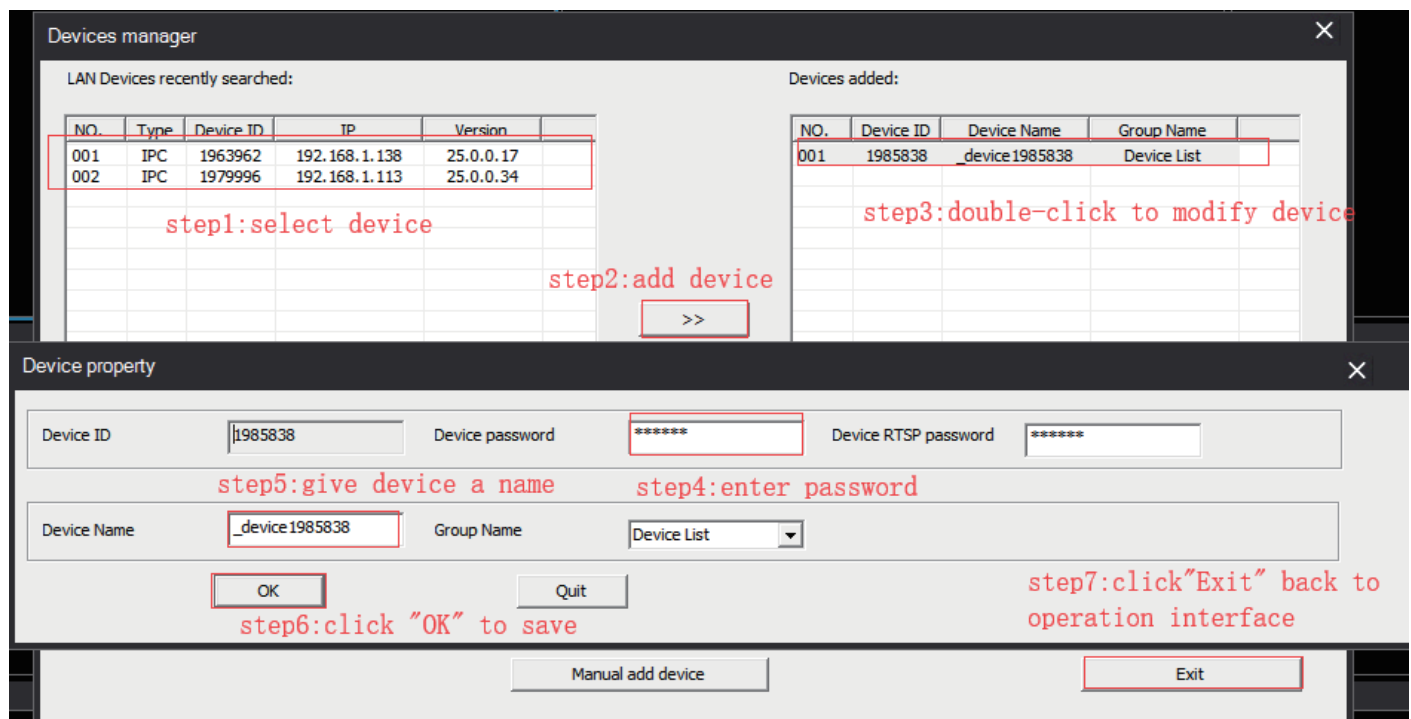

Figure 4 Completing the Add Device Window

The camera will be displayed in the device list in a window as shown in Figure 5. Double-click the camera icon to watch the live video

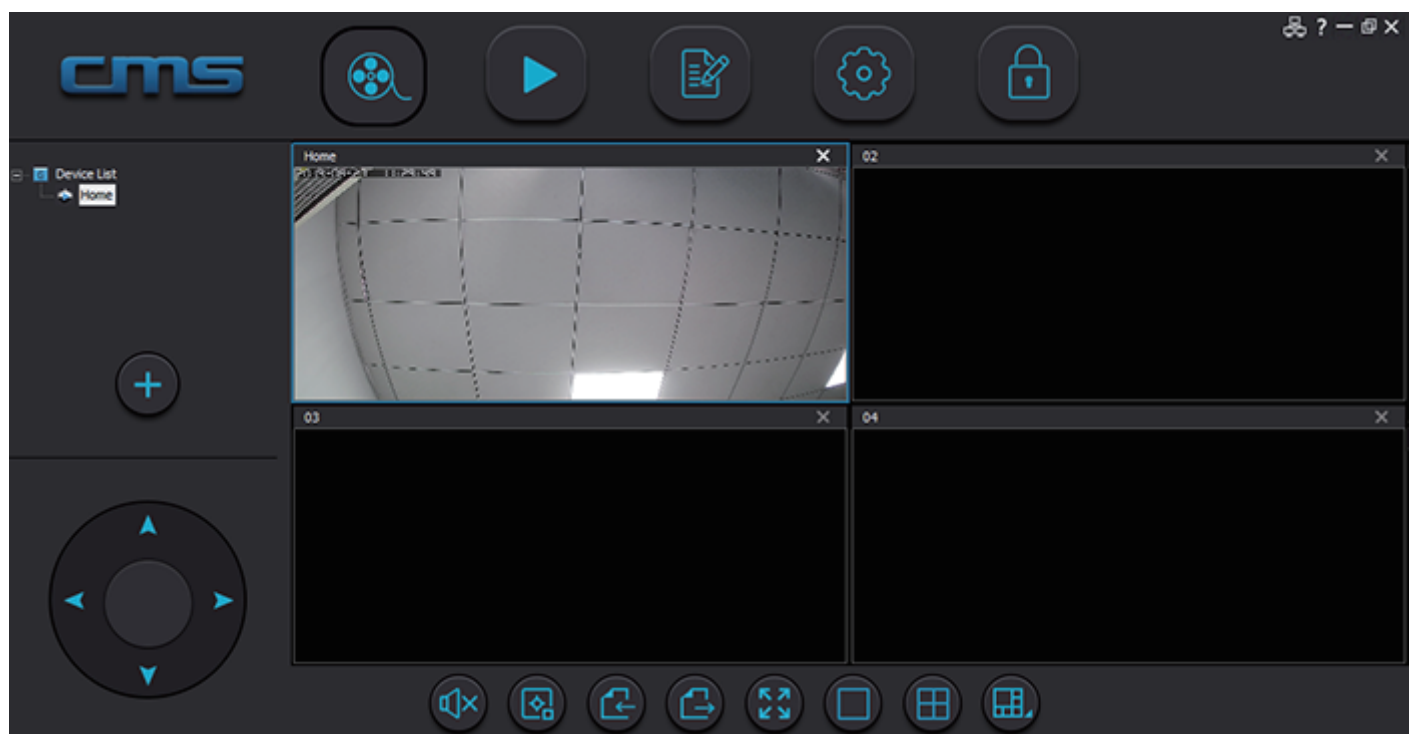

Figure 5 live video

5. Changing the image/video save folder

Click the  setting (shown at the top right corner of the window in Figure 6). A configuration window will pop up as shown. Click the “Browse” button to browse and choose an alternate folder.

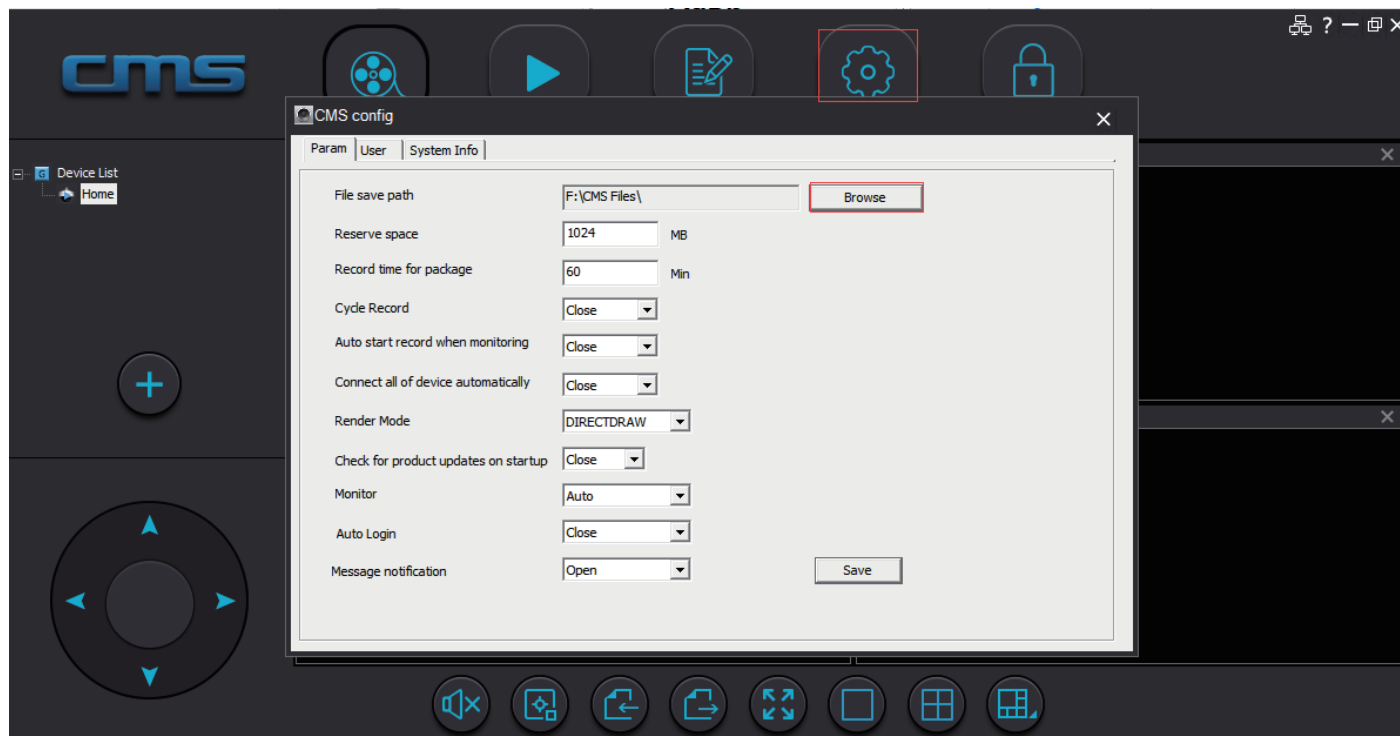

Figure 6 Path tab

6. Playback

The playback function allows files to be selected and played. The left side of the screen lists the source, type and names of files that can be played back. Click the files name to select the desired files.

Clicking the  “Playback” button allows the user to:

- Playback the camera’s recorded video in a local PC.
- Play the recorded videos stored in the micro SD memory card.
- Download files recorded on the micro SD to the local PC.

8. Mail/user login (WAN)

When using a network outside of your home or business (e.g., coffee shop, work computer, etc.) to watch live video, a free registered account is required. A separate account is required for each Sricam CMS or smart phone application.

Register an APP User Account:

Step 1: Open the link: <http://videoipcamera.cn/view/reg.html> on browser.

Step 2: Enter a new password (twice) and click on “Next” as figure10.

A screenshot of a web browser window showing a registration page. The address bar at the top displays 'videoipcamera.cn/view/reg.html' and a star icon on the right. The main content area has a black background with white text. The title 'Create an account login password' is centered at the top. Below it, there are two input fields: 'Password' and 'Confirm Password', each with a light blue, rounded rectangular button. At the bottom, there are two buttons: 'Back' and 'Next'. A mouse cursor is pointing at the 'Next' button.

Figure10 create password

Step 3: Enter your email ID and click “Next”.

NOTE: Both Sricam CMS and Sricam Smart Phone App needs a separate App account, therefore, if the email ID is used for registered on your Smart Phone App before, then cannot be used.

A screenshot of a web browser window showing a registration page. The address bar at the top displays 'videoipcamera.cn/view/reg.html' and a star icon on the right. The main content area has a black background with white text. The title 'Create a login account' is centered at the top. Below it, there is one input field labeled 'E-mail' with a light blue, rounded rectangular button. At the bottom, there are two buttons: 'Back' and 'Next'. A mouse cursor is pointing at the 'Next' button.

Figure 11 Account ID

Step 5: Enter your mail/user ID and password. Then click “Login”.

The Login window has a title bar with a close button. It contains two buttons: "admin login" and "mail/user ID login". The "mail/user ID login" button is highlighted with a red border. Below these buttons are three input fields: "mail/user ID" with the text "028****", "Password" with "*****", and "Language" with a dropdown menu set to "English". At the bottom, there are two checkboxes: "Keep Password" and "Auto Login", both of which are unchecked. Below the checkboxes are two buttons: "OK" (highlighted with a red border) and "Cancel".

Figure 12 Login Window

Add the device on Sricam CMS:

Click , “Add Device” button as shown in Figure 13 and enter your device’s setup information as following steps:

The Sricam CMS main interface shows a top navigation bar with icons for device management, playback, settings, and security. The main area displays a "Device List" on the left and several video feeds (01, 02, 03, 04, 07) on the right. A "Devices manager" dialog box is open in the center, with an "Add device" sub-dialog box. The "Add device" dialog box contains the following fields and steps:

- Step1:** click add device icon (pointing to the "+" button in the bottom left).
- Step2:** manual add device (pointing to the "Manual add device" button).
- Step3:** enter device ID (pointing to the "Device ID" field with the text "198****").
- Step4:** enter device password (pointing to the "Device password" field with the text "*****").
- Step5:** give camera a name (pointing to the "Device Name" field with the text "Office").
- Step6:** click "OK" (pointing to the "OK" button).
- Step6:** click "Exit" back to operation interface (pointing to the "Exit" button).

The "Devices manager" dialog box also shows a table for "LAN Devices recently searched:" and a table for "Devices added:". The "Add device" dialog box has "Device RTSP password" and "Group Name" fields, and a "Device List" dropdown menu.

Figure 13 Add Device Screen

The camera will be displayed in the device list in a window as shown in Figure 14. Double-click the device icon to watch the live video.
